

Creating business value,  
**together.**

# Cloud without compromise

Local. Secure.  
Connected.

Cloud arrived on a wave of hype. And in many ways, it's been a game-changer for businesses of all shapes and sizes – delivering new cost efficiencies and more innovative ways of working. But with the benefits came the

complexities of planning, designing, sizing, implementing and managing added infrastructure.

It can be hard to escape the sense that cloud hasn't quite come of age. Until now. StarHub is leading the

second wave, when cloud becomes a true enabler. StarHub cloud helps businesses design, build and manage a virtualised environment that meets their needs now and as they grow.

The cloud your business demands is finally here.

## Virtual Private Cloud

Get compute, storage, security and networking services with 24x7 support on an Enterprise SLA.

## Hybrid Cloud

Integrate your on-premise and public cloud environment with our cloud network.

## Dedicated Private Cloud

Create, deploy and scale a secure, reliable, high-performance cloud that meets your unique needs.

## Realising cloud's full potential.

Learn how StarHub Cloud enables smarter ways of working.

Whether you choose a private or hybrid cloud solution for your business and no matter how we tailor it to your specific needs, StarHub Cloud is always built around three key pillars:

### Robust platform

Our agile, state-of-the-art cloud environment means you'll be ready for anything, scale up or down with ease.

### Smarter network

We provide enterprise-grade, next-generation connectivity between every customer promise and our Singapore-based data centre.

### Cost simplicity

Our transparent solution pricing is designed to ensure you never have to worry about shock bills, hidden costs or fluctuating currencies.

## Discover how we do cloud.

When it comes to our next-generation cloud platform, everything we do for customers like you is underpinned by this simple motto: **Local. Secure. Connected.**

### Local.

Because we offer a truly Singapore-based cloud – so data never leaves Singapore. This locally grown partnership delivers native support and pricing.

### Secure.

Because our cloud platform was built to not only withstand cyberattacks but proactively identify and manage threats before they become problems.

### Connected.

Because we bring your world together on a seamless, flexible and secure network that enables smarter ways of working and drive real growth.

## See what makes our cloud ecosystem unique.

## Rise above standard-issue solutions.

Learn more about what lifts our cloud ecosystem above the rest.

### Data Centre

**Stay in real-time control of your integrated cloud ecosystem.**

The heart of our cloud environment offers dual redundancy for high availability. And we're the only provider that gives you superior manageability and real-time control of your data centre and network.

### Security

**Stop threats before you even see them.**

Our proactive defense system automatically redirects traffic with little to no participation on your part. And our real-time reporting gives you live performance updates, keeping you up to speed with every threat.

### Network Connection

**Get the connectivity edge with our Intelligent Network service.**

From scalable intranet and internet to a Virtual Private Network (VPN) service, SW-E provides seamless connectivity between LAN, WAN and a single IP for your offices, business sites and data centre.

## Value-added service makes your powerful cloud solution even stronger.

Dedicated, secure and cost-effective, Cloud Connect is a value-added service that uses MPLS technology to connect all your business sites on a single Virtual Private Network (VPN). This gives you:

- Direct connectivity from your private network to major cloud providers
- Seamless access to cloud-hosted applications and data from multiple offices
