

STARHUB CYBERSECURITY SOLUTIONS

STARHUB BUSINESS

Cybersecurity is vital in today's increasingly interconnected world. At StarHub, we provide solutions that enhance your organisation's cyber resilience, from protection against malicious software to data backup.

OVERVIEW OF CYBER ESSENTIALS

The Cyber Essentials mark is a cybersecurity certification for organisations that are embarking on their cybersecurity journey. Developed by the Cyber Security Agency of Singapore (CSA), it serves to recognise that your organisation has put in place good cyber hygiene practices to protect your operations and your customers against common cyber-attacks.

The products listed here will help your organisation to address the measures in the Cyber Essentials mark¹.

SECURE/PROTECT

Virus/malware protection - Protect yourself from malicious software

SASE FOR SME

SASE for SME² is a cloud-based multi-layer security solution that prevents and eliminates all kinds of malicious attacks and threats, ensuring full security over customers' devices when accessing the internet and cloud.

BROADBAND SHIELD

Protection from cyber threats starts with a secure broadband connection with StarHub.

BROADBAND SHIELD²:

Broadband Shield² filters all malicious incoming and outgoing traffic to keep organisations safe from cyber threats such as malware and viruses.

BROADBAND SHIELD+²:

Broadband Shield+² comprises the full Unified Threat Management functionalities, including Firewall and Anti-Virus, which detect, prevent, and clean up cyber threats such as malware and viruses.

BACKUP

Back up your essential data

BACKUP AS A SERVICE (BAAS)

Backup as a Service ensures your organisation's essential data is always protected and accessible with backup storage and restoration.

FIND OUT MORE ABOUT STARHUB'S SOLUTIONS

¹ Organisations seeking Cyber Essentials certification should complement these products with additional measures to fully meet the certification requirements.

² Product comprises additional features that go beyond Cyber Essentials.
