

Empower your workforce to be your first line of cyber defence

with StarHub Cybersecurity Awareness Training Platform

In today's digital landscape, the threat of phishing attacks looms large, endangering not only data security but also financial stability.

Powered by Cywareness, StarHub Cybersecurity Awareness Training Platform equips your employees with the tools and knowledge to identify and thwart phishing attempts to help your organisation combat cyber threats effectively.

STARHUB ENTERPRISE

PROTECT YOUR ORGANISATION'S ASSETS AGAINST CYBER THREATS

More than 90% of successful cyber-attacks start with a phishing email

Source: US Cybersecurity & Infrastructure Security Agency

Phishing remains one of the most common and effective forms of cybercrime, with organisations worldwide losing millions annually due to successful attacks.

According to the FBI's 2023 Internet Crime Report, losses surpassed USD 12.5 billion with business email compromise being a top concern.

TOP 5 INDUSTRIES FINANCIALLY AFFECTED BY DATA BREACHES

KEY FEATURES

StarHub Cybersecurity Awareness Training Platform is designed to enhance awareness, readiness and response capabilities across your organisation.

How StarHub Cybersecurity Awareness Training Platform works

AI-POWERED & TAILORED PHISHING SIMULATIONS

Utilise the AI Simulation Builder to create custom phishing simulations tailored to your company's vulnerabilities, mirroring real-world attack methods.

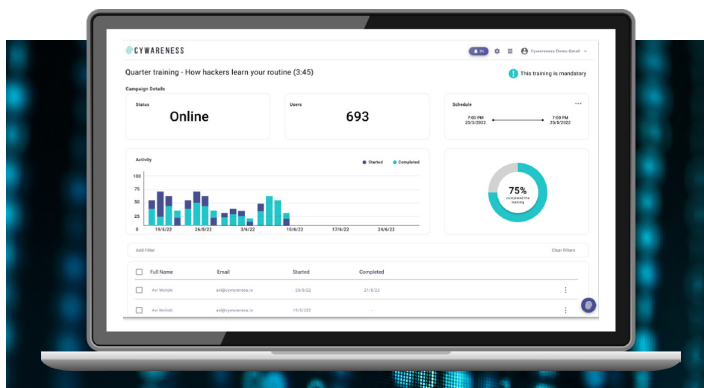

SIMULATED ATTACK TEMPLATES

Easily launch attack campaigns in minutes with multilingual SMS and email templates. Just select, set and launch!

WhatsApp message phishing simulation now available. Send messages to both private and group chats.

ENGAGING TRAINING VIDEOS

Constantly updated library of interactive training modules and engaging videos tailored to address specific cybersecurity threats.

MULTILINGUAL QUIZZES

Reinforce learnings from the training videos and simulated attacks with quizzes that can be understood by all employees.

MICRO-LEARNING REINFORCEMENT

Employees who fall for simulated attacks promptly receive immediate feedback and focused micro-training to enhance their phishing detection skills.

AUTOMATED REPORTING & ANALYTICS

Gain insights into your organisation's cybersecurity awareness with detailed reports and real-time alerts. Track employee performance and pinpoint areas for improvement efficiently.

SIMPLIFIED MANAGEMENT

Our platform requires minimal setup or ongoing maintenance, minimising the burden on your CISO and IT team.
