GALAXY Note II LTE
Be Creative

Larger than life

Its wide 5.5" HD SUPER AMOLED display is simply brilliant. Whether it's photos, videos or gaming, the 1280 x 720, 16:9 cinema-like screen presents a truly immersive viewing experience. It lets you see more, and it wants you to do more.

5.5" HD SUPER AMOLED screen

1280 x 720

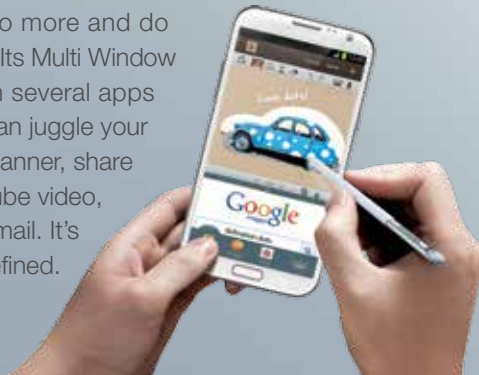

Touch to create

Whether you scribble, sketch or doodle, you can now achieve amazing things with the improved S Pen. Be ready to realise your untapped talent. Its intuitive functions let you jot down thoughts, sketch your ideas, text match, shape match and formula match seamlessly. The S Pen is cleverly rewriting the book on interactive experience.

Multitask like never before

Now, you can do more and do them all at once. Its Multi Window lets you work on several apps at one go. You can juggle your schedule on S Planner, share a video on YouTube video, and check your mail. It's multitasking redefined.

See more with one look

With Air View, you can now review details of other content without having to open new screens. Just hover your S Pen over the email list to check the content within the emails. Or search for scenes in the movie without having to stop the movie. Likewise, hover over events in your S Planner to view entries without having to open each item.

Create with precision

With Easy Clip, your S Pen becomes a precision tool where you can instantly outline and crop any visual on the screen. You can then edit the cropped visual in any creative way as you dare to be.

Putting your best face forward

Best Faces lets you select from a burst of facial expressions for the best looking face shot for everyone in the group photo. You get great photos with every shot, all the time. And with Photo Note, special moments can be better detailed simply by adding text on the back of your photos.

The power of creativity

With its muscled-up 1.6GHz quad core processor, you can enjoy faster downloading or uploading speeds on 4G networks. You have, in your hands, a true game-changer.

A multimedia powerhouse

It's truly a sophisticated multimedia playback machine. Take your game to new levels with 1080p full HD clarity. And from the ever expanding Samsung Apps, there is no limit to your entertainment collection.
