

A viewing experience you won't forget

Xperia™ Z2 is built using the latest BRAVIA® TV technologies optimised for mobile, and with over 50 years of expertise behind us, our screens are designed to give you an enchanting viewing experience – whatever you watch and wherever you watch it.

The new Xperia™ Z2 with TRILUMINOS™ Display for mobile and Live Colour LED provides the widest palette of rich natural colours, for the sharpest images you could imagine – and a viewing experience that's as close to reality as possible.

X-Reality™ for mobile analyses each image to optimise colours, sharpness and contrast, as well as reduce noise. The Super Resolution function reproduces lacking pixels, for spectacular clarity and astonishing detail, bringing your favourite moments closer to Full HD quality.

An evolution of perfection

We know that you are often around water, whether it's accidental or intentional. The waterproof and dustproof Xperia™ Z2 not only looks good, it can also face whatever life throws at it. The beautiful single, solid aluminum frame with glass panels and premium materials is a true masterpiece of Sony craftsmanship.

The durable tempered glass and uniquely designed power button shows that even the smallest of details are considered. And the 5.2" display, balanced with symmetry in design, provides a natural feel when held in your hand.

Facts and features may vary depending on local variant. Operational times are affected by network preferences, type of SIM card, connected accessories and various activities e.g. playing games. Kit contents and colour options may differ from market to market. The full range of accessories may not be available in every market. Camera and Camcorder

The camera in Xperia™ Z2 is designed using the technical expertise from the Sony Digital Imaging group that made the world's first electronic camera and consumer camcorder. The result is an unbeatable combination of the world's best mobile camera, and our most advanced camcorder ever in an 8.2mm slim smartphone.

Xperia™ Z2 combines a large 1/2.3" 20.7MP Exmor RS™ for mobile image sensor, Sony's award-winning G Lens and intelligent BIONZ™ for mobile image processing engine. These features work together to bring you sharp, vivid, and beautiful photos and videos no matter the circumstances. With our enhanced video modes you can now capture stunning detail in 4K resolution with SteadyShot™ technology, to ensure your footage will stay smooth even if you are moving. Our new Timeshift video function lets you shoot in 120 frames per second and adjust the playback speed exactly where you want, enabling you to capture hard-to-see movements and action, even underwater.

* In compliance with IP55 and IP58, this smartphone is protected against the ingress of dust and is waterproof. Provided that all ports and covers are firmly closed, the phone is (i) protected against low pressure jets of water from all practicable directions in compliance with IP55; and/or (ii) can be kept under 1.50 metres of freshwater for up to 30 minutes in compliance with IP58. Camera apps

The smartest smartphone around with a growing ecosystem of camera apps

Bring your smartphone to life with a range of innovative Xperia™ camera apps – developed to enhance your mobile experience with social and fun ways to create, and share what matters most to you.

Creative effects – create the best picture

Use the extended wide selection of creative effects to your photos and videos such as changing colours, adding image trails or applying minor effects. Available in real time for videos, these adjustments enhance your clips and open up a world of possibilities.

Background defocus – capture professional style shots

Let your focus take centre stage. Background defocus simulates a shallow depth of field. It captures two photos at different focus settings and allows you to blend together the different depths, creating a blurred background.

Timeshift video – create dramatic slow-motion effects

Our new Timeshift video mode captures high-speed clips in 120 frames per second. Use the intuitive Timeshift video editor to select and slow down one or multiple sections of your clip, and relive every detail of the action or complex movements – perfect for studying techniques in sports.

Enter a world of entertainment

Enjoy a wide range of entertainment on our best display yet – with dual speaker output and Sony's digital noise-cancelling technology. We know you like to listen to music on the go, uninterrupted, so we have added digital noise-cancelling technology and dynamic sound in our smartphone to help reduce ambient noise* by up to 98%. So no matter where you are, you can immerse yourself in the best entertainment from an unlimited library of movies, songs and games on the highest quality display.

Bundled apps

Visit the Qoo10 e-marketplace and get ready to have fun shopping at big discounts – on the go! Every new Xperia™ Z2 owner also gets a head start on their shopping spree with S\$30 worth of Qoo10 shopping coupons.

With this smart app's real-time location tracking and in-app driver details, booking a taxi across all taxi fleets has never been more convenient! Be one of the first 1,000 Sony Mobile customers to book using GrabTaxi and get S\$15 off your first ride! T&Cs apply www.grabtaxi.com/singapore/ilovesonymobile

Stay informed of Singapore and Bursa stock markets via the ShareInvestor app, with exclusive features (worth S\$66) for Sony Mobile users[^]. With ShareInvestor's streaming technology, it keeps track of your portfolio by pushing the latest stock prices directly to your device.
