

Get your StarHub TV+ box ready for Chromecast with these simple steps.

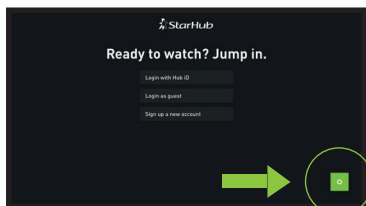

1 Set up your StarHub TV+ box by

- Plugging in the power adaptor.
- Connecting to your TV using the HDMI cable.
- Connecting to the internet via WiFi or by connecting the Ethernet cable to your broadband router.

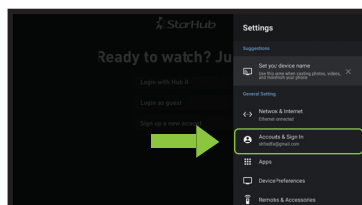

2 Follow the on-screen instructions until you reach the login screen.

3 Select the Settings icon on the bottom right corner of the login screen.

4 If you had signed in to your Google account during the on-screen instructions, go to **Set your device name** under Suggestions to set a name.

This device name will be used to identify your StarHub TV+ box on your mobile device for Chromecast.

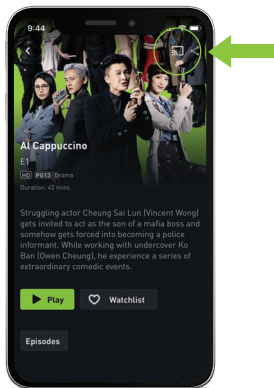

If you have skipped the Google account sign-in, go to **Device Preferences** → **About** → **Device name** to set the device name.

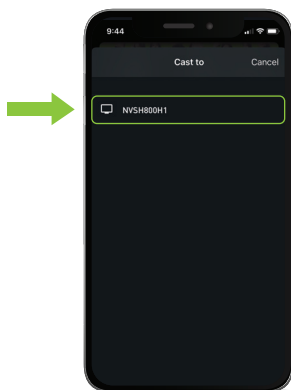

5 Log in to your StarHub TV+ app on your mobile device using your Hub iD and password.

Ensure that both your StarHub TV+ box and mobile device are connected to the same WiFi network.

6 Select the programme you would like to cast, then click on the Chromecast icon located at the top right corner of the screen.

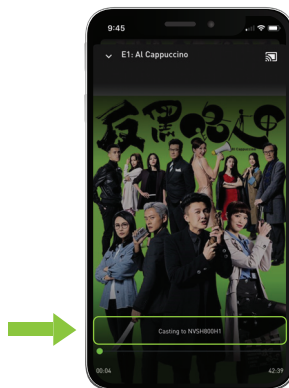

7 Select the device name that corresponds to your StarHub TV+ box.

8 Once your mobile device is connected, the Chromecast icon will turn white, and your TV screen will show **READY TO CAST**.

9 You will be able to control the programme cast using your mobile device. Do check that it shows **Casting to [device name]** on your mobile screen.

10 Enjoy your favourite programmes on your TV screen!
